

Capita

Strategic modernization and sustainable cost saving opportunities

CAPITA

Capita is the UK's leading provider of business process management and integrated professional support service solutions with 62,000 staff across the UK, Europe, South Africa and India.

“*Rosslyn Analytics’ ability to deliver a return on investment in weeks, not months, is down to its proven extraction tool, RAPid, which has given us the ability to continuously identify cost savings.*”

Challenge

Capita’s finance and procurement teams had limited visibility of relevant spend data to act on, which hindered management’s ability to holistically identify strategic cost saving opportunities across the organization.

Data was being collected manually and captured in one-dimensional Excel documents, which significantly restricted the use and sharing between departments and colleagues. Capita sought a technology platform that would give users the capability to automatically monitor, identify and measure cost saving opportunities across the group.

Solution

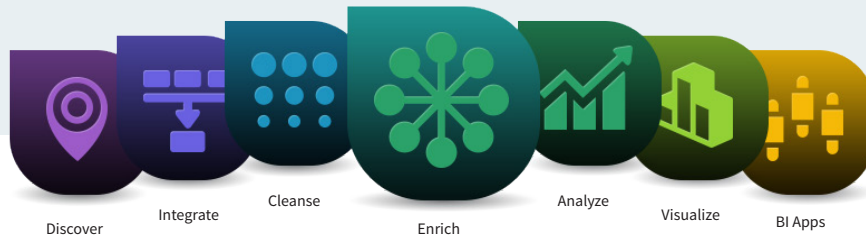

- Rosslyn Analytics extracted four years of data from one SAP system across 70 global subsidiaries, which was then loaded into the RAPid platform for automatic categorization.
- Rosslyn Analytics configured pre-built spend analysis applications that enabled Capita to produce executive dashboards and real-time “slice & dice” reports with key performance indicators.
- With direct access to the RAPid platform, Capita was able to run visibility benchmarking reports, leading to the development of strategic plans and KPIs for finance and procurement.

Results

- Capita obtained complete visibility of group-wide spend within six weeks of Rosslyn Analytics extracting data.
- Nearly 50 Capita employees, from chief executives and department heads to business analysts and category managers, have ‘on-demand’ access to spend intelligence via RAPid.
- Increased productivity of finance and procurement departments as a result of automating the monitoring and measurement of spend data including accounts payable.

About Rosslyn Analytics

Data Management. Analytics. BI Apps.

One Platform

Where Data Means Business

Driven by its mission to bring dynamic data analysis and real-time decision making to business organizations and government entities around the world, Rosslyn Analytics is a SaaS BI vendor that develops and markets the award-winning RAPid data management and analytics platform.

Focused on the preparation and management of analytics ready data, RAPid is the industry's only cloud-based solution to integrate data management and analytics capabilities via a single platform enabling customers to not only accelerate and automate the process of data integration, cleansing and enrichment from both internal and external sources but also to empower businesses to customize reports and dashboards at a fraction of the cost and time associated with traditional approaches.

Through its unique combination of business, software and data expertise, customers work with Rosslyn Analytics to realize previously unobtainable benefits that generate new opportunities from their data, drive deeper business understanding and improve competitive performance.

Rosslyn Analytics is a privately held company, headquartered in the UK with operations in London, UK and New York, USA and maintains a global partner network which includes ISVs, systems integrators, solution providers as well as industry specialist business intelligence consultants.
