The next generation in supplier performance management. Get fast visibility of your supplier performance in days, not months.

Are you negotiating great contracts but not realizing the benefits? Feel increasingly exposed to the risk in your supply chain but have no efficient way of managing it?

RAPid Supplier Performance Analytics

"

A single dashboard providing a 360˚ view of a supplier relationship is now a reality.

The performance of your suppliers, and your relationships with them, has a direct impact on the performance of your business. Without monitoring the health of these relationships, you will not maximize the available returns . Worse still, you may be opening up your business to costly failures and unnecessary risk.

The RAPid Supplier Performance Analytics app, available through the RAPid cloud platform, enables you to collect and manage the data you need for a successful Supplier Relationship Management program.

Accessible through an extremely user-friendly and intuitive interface, you will be able to create scorecards and set KPIs to monitor and record supplier performance. You'll find all this in one single application fully integrated into the RAPid platform.

You'll discover it provides unleashed potential for combining any relevant data to obtain a holistic view of your supplier relationships. One single dashboard that provides a 360 degree view of a supplier relationship is now a reality. Finally.

If you are:

Starting out with a Supplier Relationship Management program

Looking to make Excel-based performance management more efficient

Craving to simplify complex, labor-intensive supplier management programs

Then look no further.

Why monitor supplier performance?

Add Value

Closer collaboration with your suppliers facilitates stronger relationships and creates value.

Minimize Risk

Increased visibility provides increased ability to predict issues, take corrective action and reduce the risk of costly supply-chain disruptions.

Reduce Costs

Understand the business effect of late payment days, late delivery, faulty parts or missed SLAs on your profit margins and use the data to make your supply chain more efficient.

Why RAPid Supplier Performance Analytics?

Efficient, Flexible and Focused

Build performance scorecards relevant to your business in minutes, gather data fast and improve your supplier management immediately.

Instant Adoption

Painless uptake among stakeholders via a simple, mobile device-compatible interface.

360^0 Real-Time View

Integration with any data source provides a complete profile of your supplier relationships. View and analyze performance results in real-time enabling timely response to hot issues.

You're completely in control. This next generation supplier analytics app provides fully integrated user-friendly tools so you can efficiently collect data anytime, anywhere and flexibly manage your supplier management initiatives.

RAPid Supplier Performance Analytics application is a suite of integrated procurement solutions consisting of spend analytics, contract management, forensics analytics and expense analytics. These and other data quality apps and services come with an annual subscription to the RAPid cloud analytic platform.
