Spend Visibility. Delivered as a Service. 30 Days.

RAPid Spend Analytics – Enterprise delivers you spend visibility from your data like never before, without having to wait on internal resources again. In just 30 days, you'll have line-item spend data aggregated from across your global IT landscape ready for analysis by you and your colleagues.

In a single platform, you're able to conduct detailed spend analysis, manage contracts, monitor supplier performance, identify supply chain risks and more.

RAPid Self-Service Spend Analytics – Professional

How It Works

We use the patent-pending technologies built into the RAPid platform to integrate, cleanse and enrich (I.C.E.) raw data so it is ready for analysis 24/7. We do all the hard work on your data, behind the scenes.

Integrate

Integrate your spend data into a single source of truth
We extract your data from disparate legacy IT systems using our vendor-certified connectors for SAP, Oracle and others before aggregating it all into one view. You just choose how often you want to refresh your data.

Cleanse

Cleanse your spend data so it's complete and accurate
We use our machinelearning technologies to auto-detect and correct data. This means de-duplicating and normalizing supplier names and providing correct supplier addresses.

Enrich

Enrich your data to turn it into valuable insight
We connect your spend data with the largest library of enrichment sources available. These are all on tap so you have contextual information such as which suppliers present a financial risk, how a natural disaster may disrupt your supply chain and much more.

Analyse

Analyze your data using pre-existing dashboards and reports
We have provided for you. What's unique is that here, you have the ability to conduct advanced line-item categorization on-the-fly so you're in control of what and how you want to view your purchases. We can also create multiple taxonomies.

Visualise

Visualize your data
Including searching for and drilling down from dashboards into line-item information in just one-click. Discover and share insight with RAPid's reporting, export and collaboration tools.

Business and Technology Value

RAPid Spend Analytics – Enterprise solves your spend visibility challenges in way that is faster, easier and more cost effective than any other spend analysis solution on the market. Many of our clients achieve a return on investment in just eight weeks because RAPid gives you access to do more with your data than ever before, in a single platform.

Business Value

Complete data integration
Single source of the truth for data from your disparate legacy IT systems

Data quality
Self-service tools enable users to cleanse and enrich data 24/7

Faster time to spend visibility
Connect spend data with external sources of contextual business information

Collaboration
Single platform with all data eliminates reporting silos across your organization

Fastest return on investment
Spend visibility in just 30 days including complete view of supply chain

Technology Value

Data consolidation
Aggregate disparate data sources from across existing IT landscape and systems

Single source of tools
Users have access to tools to obtain, visualize and improve data quality on-demand

Consolidate IT investments
Lower cost of technology by subscribing to a secure hosted environment including moving IT into the cloud

Agile analytics
Obtain new reporting capabilities by simply adding data to single platform – no more building, buying or integrating multiple reporting systems

Scalable performance
Re-allocate IT resources from back-office to front line customer service

Financial Value

Cost savings
Significantly lower total cost of IT and data management by using a single platform for your analysis and reporting.

Time to analysis
Pre-built dashboards and reports allows users to visualize information immediately

Data quality
Improve accuracy by automatically cleansing address data and classifying data on-the fly

Business apps
Single sign on to view and access library of apps such as spend analysis, contract management, duplicate payments, fraud watch

Better information
Ready-to-use data for analysis shifts focus on obtaining data to analyzing information

Innovative Features:

RAPid Self-Service Address Cleansing App
Automatically cleanse address data

RAPid Self-Service Data Classification Engine
Conduct advanced line-item categorization on the fly

Data Enrichment Apps
Manual enrichment of supplier data, i.e. diversity and credit risk

RAPid Contract Management
Easily connect your spend data to pre-built modules

RAPid Report Builder
Create your own personalized analytical apps in minutes

Pre-Built Reports
Use immediately without IT assistance
