Rosslyn Analytics

For people who see the cloud as a competitive advantage

Digital disruption is rapidly changing the way organizations create and deliver business value. It's no wonder that business and IT leaders are actively embracing cutting-edge technologies including data analytics and machine learning to gain a competitive advantage.

Significantly reduce the complexity, cost and time of getting data into Azure so you can create accelerated business value with Rosslyn Analytics.

- Easily extract ERP data
- Move your data and apps to the cloud
- Improve data quality in real-time
- Test Azure before transitioning

❝❞

Though valuable, simply having a visualization tool to analyze data isn't enough today. Rosslyn Analytics is disrupting the BI market built on traditional data warehousing architecture with its cutting-edge RAPid Cloud Analytics Platform.

Garth Fort,
General Manager of the Cloud & Enterprise Partner Group at Microsoft

Microsoft

Designed for speed, the RAPid Cloud Analytics Platform, powered by Microsoft Azure, provides you with all the self-service tools required to quickly collect, integrate and improve the quality and relevancy of data for analysis. RAPid also incorporates Microsoft's applications including the Cortana Analytics Suite to give you competitive advantage.

| Start to automatically extract ERP data in five minutes | Centralize data into a single data warehouse, as a service | Improve data quality in real-time e.g. normalizing names | Quickly create, edit and deploy analytic apps with ease | Continuously analyze, update and improve data in Power BI | Run advanced analytics with machine learning capabilities |

Pre-built analytic solutions

Recognized by Forrester Research as a strong performer in its report, "The Forrester Wave™: Cloud Business Intelligence Platforms, Q4 2015," Rosslyn Analytics makes it quick, easy and cost effective for organizations to create business value from previously unattainable data.

The RAPid Cloud Analytics Platform comes ready to use with pre-built analytics, so time to insight is reduced from months to mere hours: **Customer Analytics; Employee Analytics; Finance Analytics; Product Analytics; Spend Analytics;** and, **Supply Chain Analytics.**
